

4 Corruption is a situation where the funds of the community, organization, country or any other independent body where the resources are misallocated and failure to manage the scarce available resources.

I would ensure that I build capacity of the people who needs the service most. For example most countries that suffer from chronic fragility conflict and evidence which even the most suffering:

Another one is that I should deliver the goods invest in institutions and policy as well as ensuring sustainable improvement in the country's service delivery.

I would use the power of technology to build dynamic and continuous exchange between key stakeholders, citizens, government, civil society organisations and many others.

By observing the power of the people to create pathways that give citizens relevant tools to engage and participate in their government identify priorities, problems and find the solutions to the problems in their country.

Ensuring sanctions of matter where punishments are given to the people involved in the scandal of corruption and this would help to end corruption.

Ensuring that the red tape are being cut that is to say bringing together the formal and informal processes thus uniting government and non governmental organisations.
