4. Corruption refers to a situation resources of a country are being wasted by top most individual who feed their stomachs instead of working for the citizens.

#### POWER OF THE PEOPLE:

I would create pathways that would give and help to participate in leadership. learn of their problems and finally see ways of solving them.

#### LEARNING BY DOING:

Any good strategy must be continually monitored and evaluated to make sure it can be easily adapted as situations on the ground change.

GET INCENTIVES RIGHT: Anti-Corruption measures with market, behavioural, social forces, adopting Integrity standards is a smart decision made to control corruption.

GIVING PUNISHMENTS: Punishing of corruption is a vital component of any effective anti-corruption measure which serves as a great effort in solving corruption problem.

#### ACT GLOBALLY AND LOGICALLY:

The matter is that all citizens should be kept to and engaged on corruption at local and national levels or globally and how in scale and scope of corruption.

#### CAPACITY BUILDING OF CITIZENS:-

There are very many countries that have suffered seriously on corruption and I would therefore emphasize that all citizens be equipped with capacity building skills.

In conclusion all citizens involved in corruption should be punished heavily so that the practice is stopped or imprisoned forever.
