

S. A

Completion

Kemi Balogun 19th March 16

Need to remember is that we should always aim for the HIGHS SO IF WE DROP WE DROP ONE BELOW, so if your teacher say your gonna get an A at you get an A+ because they don't want us black people to learn especially the government they think black people shouldn't get proper EDUCATION, but we should.

My conclusion is to keep trying to get as much education as you can, so when you are older you will be able to get a better job a happy life and have a good and better generation and family.

And That is why I personally think that My education is important.

~~Finished~~ Finished.
