

NAME:

OCHEN SOLOMON

SCHOOL: DR. OBOTE COLLEGE

AGE : 14 - 16

COUNTRY: UGANDA

TOPIC (QUESTION) : What are your views on
the topic of land grabbing?

What are your solutions to
these challenges?

What is your family, or people
you know, doing about it?

I tremendously thank the one who thought of this good topic. Land grabbing in Africa is not what one may just talk about but this ^{is} what is happening in Africa today. As a matter of fact, I am one of the victims of land grabbing in specifically Uganda therefore, I am sharing experience since it is the best teacher.

Before we go further, we should mark the word "grab" which means taking some thing in a way that is not amicable.

Therefore land grabbing is to take land from the owner in a way that is not amicable.

I as Ochen my view on land grabbing is negative because of the grave repercussions it has on the inhabitants and to the environment (natural resources).

On the other hand, land grabbing is meritorious if it is to be done in an appropriate way as we are going to see.

In this concised and précis essay, we are going to look at the negative effects of land grabbing on food production, the merciless displacement of people from their land, Over population in conjunction with unemployment and its effects to the environment through deforestation, industrialisation and destruction of wetlands.

Finally we shall look the possible remedies to the challenges
